Md Aarif Raja

React Native Developer

+91 9835761124 arifraza911@gmail.com https://www.linkedin.com/in/md-aarif-raja-205b26233

PROFILE SUMMARY

Experienced React Native Developer with over 2.5 years of hands-on experience in designing, developing, and deploying cross-platform mobile applications for Android and iOS. Proficient in JavaScript, React Native, React.js, Tailwind CSS, and Redux Toolkit, with a strong focus on delivering responsive UIs and seamless user experiences. Demonstrated expertise in integrating REST APIs, optimizing app performance using React Hooks (useMemo, useCallback, React.memo), and implementing real-time features like push notifications (FCM) and OTP-based authentication. Adept at working in agile teams, maintaining clean code, and continuously learning new technologies. Seeking to contribute to innovative mobile solutions in a growth-oriented environment.

SKILLS

React Native	Typescript	Css
React Js	Redux Toolkit	Python
JS	HTML	Django Rest Framework

PROFESSIONAL EXPERIENCE

React Native Developer @Tech Rajendra Pvt Ltd — June 2025 - Present

Project : SpacePe BAAS App

- Developed a scalable Banking-as-a-Service **(BaaS)** mobile application using React Native, enabling businesses to manage financial operations efficiently.
- Built features for bulk **invoice generation and management**, reducing manual effort and improving billing accuracy.
- Implemented bulk payment processing system allowing users to execute multiple transactions in a single workflow.
- Designed and developed **bill creation and payment modules**, supporting seamless end-to-end transaction handling.
- Enabled company account management features, including onboarding, profile management, and transaction tracking.
- Collaborated closely with backend teams to design and refine **REST API** contracts, improving data consistency and reducing sync issues across platforms.
- Enhanced app stability by applying best practices in **performance optimization, asynchronous** workflows, and error-handling strategies.
- Introduced **reusable UI** components and improved design patterns, resulting in cleaner codebase, higher maintainability, and faster feature development.

React Native Developer @LincPay Solutions Pvt Ltd — March 2024 - June 2025

Project : Merchant Onboarding and Bill Payment App (React Native)

- Onboarding System: Developed a comprehensive onboarding system for merchants and users, capturing essential details such as name, email, password, **Aadhaar** card, **PAN** card, **GST** number, and photos of the vendor's shop.
- Payment Acceptance: Implemented a feature to generate and distribute **static QR** codes for payment acceptance after approval, enhancing merchant payment capabilities.
- Virtual Terminal: Integrated virtual terminal for merchants to request payments, streamlining transaction management
- BBPS Bill Payment Integration: Integrated **Bharat Bill Payment System (BBPS)** to enable users to perform a wide range of bill payments, including mobile recharges, electricity recharges, postpaid bill payments, and more.
- Utilized **Redux Toolkit** for centralized state management and optimized API handling.
- Used AsyncStorage to store user session data and app preferences.
- Optimized performance using **useMemo** to avoid unnecessary re-computations.
- Designed smooth navigation using **React Navigation** with stack and tab navigators.
- **Redux framework** as a core dependency, ensuring efficient state management.
- Consumed RESTful web services for data transmission, utilizing JSON for efficient communication between the frontend and backend.

Project : A1Mandi App (React Native)

- A1 Mandi App is a mobile-based agricultural auction platform designed to bridge the gap between farmers and buyers across India. It enables farmers to register, list their fresh produce (vegetables/fruits), and participate in real-time auctions, while buyers can bid, purchase, and connect directly with farmers, bypassing middlemen. The app supports mandi (marketplace) registration across all Indian states, creating a unified and transparent agri-market ecosystem.
- Implemented **role-based** registration and login (Farmer, Buyer, Mandi Admin)
- Integrated **OTP-based** mobile number authentication
- Farmers can create auction listings (crop, quantity, base price, duration)
- Used **Redux Toolkit** to manage global app state (user data, auctions, bids, etc.)
- Used **useMemo** Hook for optimizing performance by memoizing computed values.
- Developed **Custom Hooks** for API calls to ensure modular and reusable logic.
- Integrated Redux Toolkit for efficient state management and seamless data flow
- Used **React.memo** for static components to prevent unwanted re-renders .
- Applied **FlatList** with keyExtractor, initialNumToRender, windowSize for smooth scrolling .
- Integrated Push Notifications using **Firebase Cloud Messaging (FCM)** .

Project : Academeet (React Native)

- Academeet was an abandoned React Native-based app designed for academic meetings and scheduling. The project was inactive for 5+ years, with outdated dependencies, broken build pipelines, and deprecated features. I took full ownership of the revival, modernizing the entire codebase and deploying it to production.
- Migrated project from React Native v0.68 → v0.77
- Updated all deprecated packages (e.g. react-navigation, react-native-video, react-native-webrtc, etc.)
- Replaced obsolete libraries with modern alternatives and ensured compatibility
- Resolved breaking changes in core modules and third-party plugins
- Converted deprecated class components to modern functional components
- Removed unused legacy code and modularized reusable UI components
- Improved project folder structure for scalability and maintainability
- Configured and fixed Android build for Play Store compatibility
- Generated signed APK / AAB and published to Play Store
- Managed app versioning, changelogs, and release notes
- Used React.memo, useMemo, and useCallback to reduce re-renders
- Enhanced app stability by applying best practices in performance optimization, asynchronous workflows, and error-handling strategies.
- Used Redux Toolkit to manage global app state (user data, auctions, bids, etc.)

EDUCATION

B-Tech - Computer Science

Technocrates Institutes of Technolgy - Bhopal.

Sep 2020 – Jun 2024
Bhopal, India

Intermediate

RSS College , Muzaffarpur

June 2017 – March 2019
Muzaffarpur, India
